65 percent of all doctors and biological scientists in the United States under the age of 40 began their study of biology with this book. For the Eighth Edition, new coauthors have joined with those from previous editions to infuse this proven text with new ideas while upholding its hallmark values. Their collaboration has produced the authoritative introduction to biology, told with a unified voice and vision.

The Best AP Biology Review Books. This is a list of the review books I think will be most helpful to students studying for the AP Biology exam. The highest-rated books include comprehensive coverage of the course material, excellent practice questions, and helpful test-taking and study-planning tips for students.

*The Best AP Biology Books 2020: Full Expert Reviews*  
Pros: Tons of useful practice tests, multiple choice and free response sample questions. Cons: Some content is not directly applicable to the AP Biology exam. Best For: Practice problems and review after a solid grasp of the material has been attained. Our Rating: 4.5 / 5 As with most of their prep guides, Barron's AP Biology is a hugely useful book, and our pick for "Best Budget Book".

Barron's is usually a standard and reputable test prep book, so I was surprised at the horrible quality of these prep questions. I suggest buying the Preparing for the Biology AP® Exam (School Edition) (Pearson Education Test Prep) book instead, where the questions and content accurately reflect what is found on the recent AP Biology exams.
