Bruising on the legs is not
necessarily dangerous, but

File Type PDF Bruising Peg

if you begin to notice bruises on the legs when you do not recall injuring yourself, then it can be a bit alarming. Since bruises often take a few days to appear, it can be easy to forget a minor incident that

File Type PDF Bruising Peg

might have caused it.
However, if these
unexplained bruises begin to
appear on the legs quite
frequently, then there may
be an underlying ailment
that could be disrupting
your circulation.

File Type PDF Bruising Peg

Bruising or bleeding is one of the most common symptoms associated with a blood cancer diagnosis. According to our 2018 patient survey, " Living with Leukaemia ", frequent bruising and bleeding precedes a

File Type PDF Bruising Peg

diagnosis of leukaemia in 24% of patients. Bruising is defined as bleeding that occurs underneath the skin, causing black, blue or purple marks to visibly appear on the skin's surface.
