A mother and child share so much together - countless milestones, simple joys, unexpected challenges, and all the little surprising moments in between. This five-year journal will help you capture it all - simply turn to today's date and take a few moments to answer the question at the top of the page. As the journal fills, it will become a loving record and cherished family keepsake.

A simple journal that offers one question per day, to be answered on the same day for five years in a row. The questions range from the prosaic ("What did you have for lunch today?") to the contemplative ("Can people really change?"), giving readers a comprehensive look back at their thoughts and feelings over a five-year span. For anybody who has ever given up journaling after being intimidated when facing a blank page, this book makes it easy to take a snapshot of your inner life in just a few minutes each day. The beauty of this journal is that it enables readers to track their emotional growth as well as keep track of memories, and provides an interesting walk down memory lane a few years later. The simple one-question prompts make this book to journaling as adult coloring books are to art - a gateway product with built-in creative inspiration. The specially-sized package features a printed flexi-bound cover, four-color endpapers, quality paper, and bookmark ribbon.

This book constitutes the proceedings of the 31st Australasian Joint Conference on Artificial Intelligence, AI 2018, held in Wellington, New Zealand, in December 2018. The 50 full and 26 short papers presented in this volume were carefully reviewed and selected from 125 submissions. The paper were organized in topical sections named: agents, games and robotics; AI applications and innovations; computer vision; constraints and search; evolutionary computation; knowledge representation and reasoning; machine learning and data mining; planning and scheduling; and text mining and NLP.

"The purpose of this document is to provide comprehensible, global, evidence-based guidelines to help formulate policies and protocols for the treatment of malaria. Information is presented on the treatment of uncomplicated malaria, including disease in special groups (young children, pregnant women, people who are HIV positive, travellers from non-malaria endemic regions) and in complex emergency situations and severe malaria."--Publisher's description.

Discover the groundbreaking method to defeat diabetes without drugs using the step-by-step diet plans and recipes from #1 New York Times bestselling author Dr. Michael Mosley. The 8-Week Blood Sugar Diet is a radical new approach to the biggest health epidemic threatening us today... Our modern diet, high in low-quality carbohydrates, is damaging our bodies—producing a constant overload of sugar in our bloodstream that clogs up our arteries and piles hidden fat into our internal organs. The result has been a doubling in the number of type 2 diabetics, as well as a surge in those with a potentially hazardous condition—prediabetes. It is now known that even moderately elevated blood sugar levels can trigger heart disease, stroke, dementia, and cancer. But scientists have recently demonstrated that you can prevent and even reverse type 2 diabetes with a simple change in diet and lifestyle. Drawing on the work of Dr. Roy Taylor—one of the UK's foremost diabetes experts—and his own experience as a one-time diabetic, Dr. Michael Mosley presents a groundbreaking, science-based, 8-week plan for diabetics who want to reverse their condition (and then stay off medication). He also offers a more flexible regime for people interested in the extensive health benefits to be gained from lowering their blood sugar levels and shedding dangerous fat. As Dr. Mosley says, it is never too late to act.

"Is it possible to eat anything you want, five days a week, and become slimmer and healthier as a result? Simple answer: yes. You just limit your calorie intake for two nonconsecutive days each week to 500 calories for women, 600 for men. You'll lose weight quickly and effortlessly, and the joy of the FastDiet is that the side effects are all welcome. The science is easy. Intermittent fasting takes your body out of go-go mode and puts it into survival mode, causing the body to slow production of new cells and repair old ones instead. As a result, you not only lose weight but also reduce your risk of a range of diseases from diabetes and arthritis to cardiovascular disease and even cancer. On top of that, you slow the aging process and boost your brain power. This book brings together the results of new, groundbreaking research to create a dietary program that can be incorporated into your busy daily life, featuring: Forty 500- and 600-calorie meals that are quick and easy to make 8 pages of photos that show you what a typical "fasting meal" looks like the cutting-edge science behind the program. A calorie counter that makes dieting easy, and much more. Far from being just another fad, the FastDiet is a radical new way of thinking about food, a lifestyle choice that doctors are actually recommending for general health. This is your indispensable guide to effective weight loss without sacrificing the foods you love and a scientifically proven way to have your cake and eat it, too"--

Research conducted over the past two decades has shown that poor patient understanding of medication instructions is an important contributor to the more than 1 million medication errors and adverse drug events that lead to office and emergency room visits, hospitalizations, and even death. Patients who have limited literacy skills, who have multiple comorbidities, and who are elderly face the greatest risk, and limited literacy skills are significantly associated with inadequate understanding and use of prescription instructions and precautions. The Agency for Healthcare Research and Quality notes that only 12 percent of U.S. adults have proficient health literacy that allows them to interpret a prescription label correctly. Given the importance of health literacy to the proper use of medications, and the apparent lack of progress in improving medication adherence, the Roundtable on Health Literacy formed an ad hoc committee to plan and conduct a 1-day public workshop that featured invited presentations and discussion of the role and challenges regarding clarity of communication on medication. Participants focused on using health literacy principles to address clarity of materials, decision aids, and other supportive

tools and technologies regarding risks, benefits, alternatives, and health plan coverage. This publication summarizes the presentations and discussions from the workshop.

This book discusses and assesses the latest trends in the interactive mobile field, and presents the outcomes of the 12th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2018), which was held in Hamilton, Canada on October 11 and 12, 2018. Today, interactive mobile technologies are at the core of many – if not all – fields of society. Not only does the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions coming out practically every day are further strengthening this trend. Since its inception in 2006, the conference has been devoted to highlighting new approaches in interactive mobile technologies with a focus on learning. The IMCL conferences have since established themselves as a valuable forum for exchanging and discussing new research results and relevant trends, as well as practical experience and best-practice examples. This book contains papers in the fields of: Interactive Collaborative Mobile Learning Environments Mobile Health Care Training Game-based Learning Design of Internet of Things (IoT) Devices and Applications Assessment and Quality in Mobile Learning. Its potential readership includes policymakers, educators and researchers in pedagogy and learning theory, schoolteachers, the learning industry, further education lecturers, etc.

UK Tax Year 2019-2020 Starts on April 6th 2019 through to April 5th 2020, and this diary is to help those whom work from home or as a self employed business person or small businesses.
