Balancing biological, psychological, social, and cultural approaches, this book's ground-breaking integrative approach is the most modern, scientifically valid method for studying abnormal psychology. Updated with leading-edge research findings, the eighth edition draws on the expertise of David H. Barlow, V. Mark Durand, and Stefan G. Hofmann, three internationally recognized experts in clinical psychology. In **ABNORMAL PSYCHOLOGY: AN INTEGRATIVE APPROACH**, the authors successfully blend sophisticated research with an accessible, engaging writing style. They go beyond simply describing different

Abnormal Psychology, 8th Edition. Going beyond simply describing different schools of thought on psychological disorders, the authors explore the interactions of the various forces that contribute to psychopathology. A conversational writing style, consistent pedagogical elements, integrated case studies, and superior coverage of the DSM-5 (with insights from author David Barlow, an Advisor to the DSM-5 task force) help lead students to an unparalleled appreciation for the current state of what is a multidimensional and compelling clinical science.

Using cases from the authors' files or from case files of other working clinicians, **CASEBOOK IN ABNORMAL**

PSYCHOLOGY, International Edition portrays the rich and arresting nature of disorders manifested in real people. Cases illustrate every major DSM-IV category, followed by a therapy outcome section that tells the "rest of the story" of what happened to these clients. Using an integrative approach, the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case. Complex cases are presented without a diagnosis, so students can come up with a diagnosis on their own. This Fourth Edition includes a new case on body dysmorphic disorder as well as two new cases without a diagnosis.

Focusing on experimental methods, authors Anne Myers and Christine Hansen lead students step by step through the entire research process, from generating testable hypotheses to writing the research report. The major sections of the book parallel the major sections of a research report (Introduction, Method, Results, and Discussion), giving students the skills they'll need to design and conduct an experiment, analyze and interpret the research findings, and report those findings. Although the main focus is on experimentation, alternative approaches are discussed as important complements.
