4. EIFS: Energy
Efficient In-Network
RFID Data Filtering
Scheme. An efficient in-
network RFID data
filtering scheme should
filter the maximum

Acces PDF Energy Efficient

amount of data to avoid
redundant transmission
in the network with less
computation. To meet
these objectives, EIFS
divides the duplications
into two types.

Besides that Active RFID offers increased working distance between the interrogator (RFID-reader) and tags, the onboard power source also enables the tags to do sensor measurements, calculations and storage even when no RFID-
