You might think the history of Data Mining started very recently as it is commonly considered with new technology. However data mining is a discipline with a long history. It starts with the early Data Mining methods Bayes' Theorem (1700`s) and Regression analysis (1800`s) which were mostly identifying patterns in data.

Mining in the United States became prevalent in the 19th century, and the General Mining Act of 1872 was passed to encourage mining of federal lands. As with the California Gold Rush in the mid-19th century, mining for minerals and precious metals, along with ranching , was a driving factor in the Westward Expansion to the Pacific coast.
