pivot tables, dress them up with graphics, and more. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

This lessons covers how to build Excel charts. Charts are the basis of any

Get Free Mastering Excel

dashboards and the main method to present data in a visually appealing way. Excel charts have many hidden options and tweaks. You will learn step-by-step, how to build basic charts and then improve them. At the end of the lesson, you will be able to create charts that appear to

Get Free Mastering Excel

Charts be impossible to build in Excel. The beginning section reviews how to use the chart wizard with all the standard options. Next the lesson covers some unfamiliar chart types (radar, pie of pie, bar of pie). After these basics, you will learn how to get crafty with charts and you will

Get Free Mastering Excel

work through exercises showing you how to accomplish visual effects that will definitely make your dashboard or workbook the talk of the office. This lesson includes a link where you can download a follow along workbook and work through the exercises at your own

Get Free Mastering Excel

Charts Like the rest of the Mastering Excel series, there is no technical jargon. Just plain English to help you learn Excel.

When you think data visualization, you might not think Microsoft Excel. But Excel offers a large

Get Free Mastering Excel Charts

number of charts and graphing tools that complement its data analysis toolset. This course offers a laser-focused, practical guide to over 20 useful Excel charts and graphs for data visualization.

Instructor Chris Dutton reviews the key principles of data visualization, and

Get Free Mastering Excel

Charts provides some introductory tips to help you customize any kind of chart in Excel. In this section, you can learn how to adjust text and cell formatting, change the chart type and axes, and leverage built-in templates. In chapter three, Chris reviews the different chart types: from

Get Free Mastering Excel

charts and pie charts, to scatter plots, histograms, funnel charts, and sparklines. Plus, learn how to create geospatial heat maps and 3D power maps, and combine different chart types on one sheet.

This lesson in the
Mastering Excel

Page 46/61

Get Free Mastering Excel

Charts covers charts, specifically interactive charts. This lesson continues to build upon the "Mastering Excel: User Forms" lesson. The User Forms lesson covered the various form objects and how to use them. The focus in this lesson is on combining user forms and charts. You will

Get Free Mastering Excel

Learn how to set up charts so users can interact with them via option buttons, spin buttons, scroll bars, etc. The last exercise shows you how to build a dashboard where users will be able to change the entire dashboard as it suits them. Users can change column charts to bar charts, pie

Get Free Mastering Excel

Charts to 3D pie charts, etc. You will learn to build one dashboard that can morph into an entirely different dashboard. As with all my lessons, there are follow along workbooks that you can use to work through the exercises at your own pace. For new students, I don't

Get Free Mastering Excel

Charts
leave you high and dry after you buy my lesson. You can always contact me with any questions you have.

This lesson focuses on many seemingly unrelated topics but then combines them in unexpected ways to create something greater than the sum

Get Free Mastering Excel

of its parts. First we review the concept of Named Ranges. What are they? How can they help in Excel? Then we cover the OFFSET function. It is truly one of the most powerful, flexible and mostly unused functions in Excel. It is unused because it does take some getting used to,

Get Free Mastering Excel

OFFSET doesn't 'work' like the rest of the Excel functions. However, we will go through this function in detail here. Then we move on to using Forms in Excel. Forms give users familiar ways to interact with an Excel worksheet, much like a form on the web. And finally, we

Get Free Mastering Excel

Charts Combine Named Ranges, OFFSET, Forms and Charts to create animated charts. Excel users will be able to click the worksheet and see the charts animate in real time. There are no macros, no programming involved; just a creative way of combining existing
