Craniopagus conjoined twins are babies who are connected at the top of the cranium. This condition occurs in about ten to 20 babies in every one million births in the US.

California twin girls, 9 months, conjoined at the HEAD are ...  
Conjoined twins, also known as Siamese twins, are identical twins joined in utero A very rare phenomenon, the occurrence is estimated to range from 1 in 49,000 births to 1 in 189,000 births, with a somewhat higher incidence in Southwest Asia and Africa. Approximately half are stillborn, and an additional one-third die within 24 hours.Most live births are female, with a ratio of 3:1.

Conjoined twins - Wikipedia  
Grace and Tippi. Tippi and Grace. Two sisters. Two hearts. Two dreams. Two lives. But one body. Grace and Tippi are conjoined twins, joined at the waist, defying the odds of survival for sixteen years. They share everything, and they are everything to each other. They would never imagine being apart. For them, that would be the real tragedy.

One of Us views conjoined twinning and other "abnormalities" from the point of view of people living with such anatomies, and considers these issues within the larger historical context of anatomical politics. Anatomy matters, Alice Domurat Dreger tells us, because the senses we possess, the muscles we control, and the resources we require to keep our bodies alive limit and guide what we experience in any given context.

One of Us views conjoined twinning and other 'abnormalities' from the point of view of people living with such anatomies, and considers these issues within the larger historical context of anatomical politics. This deeply thought-provoking and compassionate work exposes the extent of the social frame upon which we construct the 'normal.'
