101 Oral Myofunctional Therapy  
Applied On

Introduction: Speech therapy  
treatment could be considered a  
new therapy for snoring and  
obstructive sleep apnea patients  
because of its direct action on  
oral motility. The myofunctional  
therapy includes the correct use  
of the stomatognathic structures  
and functions by means of  
functional exercises (respiratory,  
suction, swallowing and chewing)

Applied On Two Cases Of Severe  
and muscular exercises with the aim of increasing the tonus and mobility of oral and cervical structures, which can be damaged in apneic patients.

## ~~Oral Myofunctional Therapy Applied on Two Cases of Severe~~

...

Myofunctional orofacial therapy treats a variety of oral and facial (orofacial) muscle (myo-) postural and functional disorders and habitual patterns. An individualized regimen of exercises are used to correct tongue and lip resting postures as well as developing correct chewing and swallowing patterns through increasing awareness to the muscles in the mouth and face.

Oropharyngeal and tongue exercises (myofunctional therapy) have been shown to improve obstructive sleep apnea.

However, to our knowledge, a systematic review has not been performed for snoring. The study objective is to perform a systematic review, with a meta-analysis, dedicated to snoring outcomes after myofunctional therapy.

Current literature demonstrates that myofunctional therapy decreases apnea-hypopnea index by approximately 50% in adults and 62% in children. Lowest oxygen saturations, snoring, and sleepiness outcomes improve in adults. Myofunctional therapy could serve as an adjunct to other obstructive sleep apnea treatments.

## ~~ABOUT VICTORIA~~ — Integrative Myofunctional Therapy

This therapy is designed to correct oral muscle function as it relates to dental problems and speech disorders, using exercises for the tongue, lips, and facial muscles. It is most often used to alter a tongue thrust swallowing pattern, assists with improved outcomes in orthodontia, and can help open-mouth breathers to become nasal breathers.
