Augusta Ada, Countess of Lovelace, (1815-1852) is often referred to as the first computer programmer. Most frequently called Ada Lovelace, her father, the scandalous poet Lord Byron, was the Victorian equivalent of a rock star, so Ada was famous from birth. Her mother, Lady Byron, had received an education in mathematics, unusual at the time for a woman.

Find out how Lovelace's determination helped her become the first computer programmer.

### Programming Pioneer Ada Lovelace - Lerner Publishing Group

Ada Lovelace Becomes the World's First Computer Programmer. London-born Ada Lovelace (1815–1852) had a passion and gift for mathematics from a young age. She is credited with being the world's first computer programmer, as she drafted plans for how a machine called the Analytical Engine could perform computations. The machine, invented by her friend, mathematician and inventor Charles Babbage, is considered to be the first general computer.
