Chi è un Samurai? La definizione più affascinante è forse questa: un catalizzatore di energie. Lo spiega il Bushido, l'antichissimo Codice che regolava vita e morte dei leggendari guerrieri giapponesi: quando «le menti di tutti coincidono, le energie si armonizzano, e quando le energie si armonizzano, la forza è unica e uniforme». Pierluigi Tosato, manager e amministratore delegato di importanti aziende multinazionali, ha fatto della sua vita personale e professionale quella di un «Manager Samurai» capace di radunare attorno a sé le forze e le

energie in grado di trasformare una normale azienda in un'impresa da sogno. Con la passione di un romanzo e la forza argomentativa di un saggio, Tosato ci racconta il suo viaggio verso la «la montagna inaccessibile» - un'avventura ricca di volti, sfide, traguardi - e ci svela i segreti che portano al successo nella gestione di un'impresa. In questa nuova edizione, rivista ed arricchita, emerge con forza ancora maggiore il messaggio di fondo dell'autore: la leadership del mondo contemporaneo è malata di narcisismo; il concetto stesso di successo viene osservato con le lenti distorte dell'individualismo e del risultato di breve periodo ad ogni costo. Guarire dal cancro del narcisismo significa passare dall'io al tutto, dall'alienazione all'autenticità, dall'effimero dominio su cose e persone alla realizzazione di un valore condiviso.

Offers a revolutionary perspective on adversity that will empower you to cooperate with your own destiny, live a far more effective life, and heal even the deepest wounds of the heart.

Since cities emerged ten thousand years ago, they have become one of the most impressive artifacts of humanity. But their evolution has been anything but linear—cities have gone through moments of radical change, turning points that redefine their very essence. In this book, a renowned architect and urban planner who studies the intersection of cities and technology argues that we are in such a moment. The authors explain some of the forces behind urban change and offer new visions of the many possibilities for tomorrow's city. Pervasive digital systems that layer our cities are transforming urban life. The authors provide a front-row seat to this change. Their work at the MIT Senseable City Laboratory allows experimentation and implementation of a variety of urban initiatives and concepts, from assistive condition-monitoring bicycles to trash with embedded tracking sensors, from mobility to energy, from participation to production. They call for a new approach to envisioning cities: futurecraft, a symbiotic development of urban ideas by designers and the public. With such participation, we can collectively imagine, examine, choose, and shape the most desirable future of our cities.

An electrifying, internationally bestselling investigation of the global cocaine trade now a series on Prime Video starring Andrea Riseborough, Dane DeHaan, and Gabriel Byrne, from the author of the #1 international bestseller Gomorrah “Zero zero zero” flour is the finest, whitest available. It is also the nickname among narcotraffickers for the purest cocaine on the market. And it is the title of Roberto Saviano's unforgettable exploration of the inner workings of the global cocaine trade—its rules and armies, and the true depth of its reach into the world economy. Saviano's Gomorrah, his explosive account of the Neapolitan mob, the Camorra, was a worldwide sensation. It struck such a nerve with the Camorra that Saviano has lived with

twenty-four-hour police protection for more than eight years. During this time he has come to know law enforcement agencies and officials around the world. With their cooperation, Savaiano has broadened his perspective to take in the entire global “corporate” entity that is the drug trade and the complex money-laundering operations that allow it to function, often with the help of the world’s biggest banks. The result is a harrowing and groundbreaking synthesis of literary narrative and geopolitical analysis exploring one of the most powerful dark forces in our economy. Saviano tracks the shift in the cocaine trade’s axis of power, from Colombia to Mexico, and relates how the Latin American cartels and gangs have forged alliances with crime syndicates across the globe. He charts the increasing sophistication of these criminal entities as they diversify into other products and markets. He also reveals the astonishing increase in the severity of violence as they have fought to protect and extend their power. Saviano is a writer and journalist of rare courage and a thinker of impressive intellectual depth, able to see connections between far-flung phenomena and bind them into a single epic story. Most drug-war narratives feel safely removed from our own lives; Saviano offers no such comfort. Both heart-racing and eye-opening, ZeroZeroZero is an investigative story like none other. Praise for ZerZeroZero: “[Saviano] has developed a literary style that switches from vivid descriptions of human depravity to a philosophical consideration of the meaning of violence in the modern world. . . . Most important of all is the hope Saviano gives to countless victims of criminal violence by standing up to its perpetrators.” —Financial Times

The MIT based SENSEable City Lab under Carlo Ratti is one of the research centers that deal with the flow of people and goods, but also of refuse that moves around the world. Experience with large-scale infrastructure projects suggest that more complex and above all flexible answers must be sought to questions of transportation or disposal. This edition, edited by Dietmar Offenhuber and Carlo Ratti, shows how Big Data change reality and, hence, the way we deal with the city. It discusses the impact of real-time data on architecture and urban planning, using examples developed in the SENSEable City Lab. They demonstrate how the Lab interprets digital data as material that can be used for the formulation of a different urban future. It also looks at the negative aspects of the city-related data acquisition and control. The authors address issues with which urban planning disciplines will work intensively in the future: questions that not only radically and critically review, but also change fundamentally, the existing tasks and how the professions view their own roles.

In Carlotto's *The Campagna Trail*, Inspector Campagna uses an old friendship with notorious drug dealer Roby Pizzo in a Machiavellian attempt to keep the peace. But when an interfering new police chief demands Campagna bring down the Mafioso who heads Pizzo's gang, Campagna must use every weapon he has to save his job - and his life. Meanwhile in Carofiglio's *The Speed of the Angel*, a writer in crisis strikes up an unlikely friendship with a mysterious woman he meets in a quiet seaside café. As their conversations deepen, and their obsessions darken, their drug-fuelled relationship begins to spiral, in this haunting tale of

damnation and redemption. Finally in De Cataldo's *The White Powder Dance*, the city police are put on the trail of a baby-faced new graduate in the Milanese banking sector. As the pursuit accelerates through back streets and skyscrapers, it becomes clear that there is more to organised crime than getting your hands dirty.
