We recommend an average of 6-8 hours a week study time for each course depending on experience; this is assuming the study period is 3 months for Certificate courses, 6 months for Advanced Certificate courses and 9-12 months for Diplomas. This is an average and you should plan to increase the amount of study time around assignment and exam times.

A Framework for Value Management Practice—Second Edition begins by providing readers with the background needed to understand the origins of this complex and rapidly evolving practice. The second chapter builds on this foundation, by helping readers understand how the deceptively simple concept of "value" is actually a complex interweaving of factors that include time, people, subject and circumstance. Dr. Thiry then walks the reader step by step through the complexities of different value methodologies. The updated third chapter describes tools and techniques that can be used to achieve the objectives of a value study, including the latest integrative techniques. The fourth chapter, which has been completely rewritten, covers value integration as seen within an Organizational Project Management (OPM) context.

The SAVE International Value Methodology (VM) Body of Knowledge, VM Guide®, is the definitive resource for the theory and practice of value improving techniques. This essential guide serves as the foundation for SAVE International's standards of practice and professional certification program. In it, readers will find a wealth of information regarding the underlying process, known as the VM Job Plan, as well as guidance on the application of techniques that support the performance of VM Studies. This volume also includes practical guidance on facilitation techniques as well as the creation and management of VM programs.

To support the broadening spectrum of project delivery approaches, PMI is offering A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition as a bundle with its latest, the Agile Practice

Guide. The PMBOK® Guide – Sixth Edition now contains detailed information about agile; while the Agile Practice Guide, created in partnership with Agile Alliance®, serves as a bridge to connect waterfall and agile. Together they are a powerful tool for project managers. The PMBOK® Guide – Sixth Edition – PMI's flagship publication has been updated to reflect the latest good practices in project management. New to the Sixth Edition, each knowledge area will contain a section entitled Approaches for Agile, Iterative and Adaptive Environments, describing how these practices integrate in project settings. It will also contain more emphasis on strategic and business knowledge—including discussion of project management business documents—and information on the PMI Talent Triangle™ and the essential skills for success in today's market. Agile Practice Guide has been developed as a resource to understand, evaluate, and use agile and hybrid agile approaches. This practice guide provides guidance on when, where, and how to apply agile approaches and provides practical tools for practitioners and organizations wanting to increase agility. This practice guide is aligned with other PMI standards, including A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition, and was developed as the result of collaboration between the Project Management Institute and the Agile Alliance.

Prepare for Microsoft Exam 70-761—and help demonstrate your real-world mastery of SQL Server 2016 Transact-SQL data management, queries, and database programming. Designed for experienced IT professionals ready to advance their status, Exam Ref focuses on the critical-thinking and decision-making acumen needed for success at the MCSA level. Focus on the expertise measured by these objectives:

- Filter, sort, join, aggregate, and modify data
- Use subqueries, table expressions, grouping sets, and pivoting
- Query temporal and non-relational data, and output XML or JSON
- Create views, user-defined functions, and stored procedures
- Implement error handling, transactions, data types, and nulls

This Microsoft Exam Ref:

- Organizes its coverage by exam objectives
- Features strategic, what-if scenarios to challenge you
- Assumes you have experience working with SQL Server as a database administrator, system engineer, or developer
- Includes downloadable sample database and code for SQL Server 2016 SP1 (or later) and Azure SQL Database

Querying Data with Transact-SQL About the Exam Exam 70-761 focuses on the skills and knowledge necessary to manage and query data and to program databases with Transact-SQL in SQL Server 2016. About Microsoft Certification Passing this exam earns you credit toward a Microsoft Certified Solutions Associate (MCSA) certification that demonstrates your mastery of essential skills for building and implementing on-premises and cloud-based databases across organizations. Exam 70-762 (Developing SQL Databases) is also required for MCSA: SQL 2016 Database Development certification. See full details at: microsoft.com/learning

This Function Analysis Guide will give you a greater understanding of Function Analysis to the extent that it becomes second nature to those using the Value Methodology to improve their projects, products, and processes. Application of the techniques covered herein will result in better studies and, most importantly, better results. Lawrence D. Miles, the "Father of Value Analysis," stated "the customer wants a function." People want functions, not things. Function Analysis is considered the heart of the Value Methodology (VM), yet many people have difficulty applying its concepts and techniques to their projects, products, and processes. This document provides guidance on the process and application of function analysis, including Function Analysis System Technique (FAST) for practitioners and those who are preparing to become certified through SAVE International(R).

This jargon-free book demystifies all the concepts required for a well rounded understanding of the theory of Value Engineering (VE) and Value Engineering Certification Programmes. Value Engineering Mastermind: From Concept to Value Engineering Certification helps the readers to:

- Understand VE concepts.
- Practise VE concepts and acquire the Society of American Value Engineers (SAVE) International Certifications—accorded in India by the Indian Value Engineering Society (INVEST).

A special feature of this book is a set of questions at the end of every chapter to test the knowledge acquired, with answers at the end of the book. Since the book provides insights into the development of managerial traits through VE, it will be an important resource for companies that have begun to provide VE training to their employees, besides students of engineering and MBA courses. It will also be of much use to professional societies like the Indian Value Engineering Society, the Society of Indian Value Management, SAVE International, etc.

This book- "Multiple Sclerosis Nursing International Certification Examination: A Step by Step Guide on How to Prepare for and Pass the MSCN Exam" is designed to help you, the MSCN Exam Candidate, learn or hone your test taking strategies, to increase your chances of "Acing" the MSCN exam. You will be familiar with critical test taking strategies to focus on, as you prepare to take this very important exam. The book will give you a step by step guide on the best ways to study for your certification examination. You will get information about important resources that will prove to be very helpful to anyone preparing to take the MSCN Exam! The book has Practice Test Questions that are written to simulate the format of questions found in actual certification examinations. The Blueprint of the Multiple Sclerosis Nursing International Certification Examination, as outlined in the MSNICB Exam Handbook, was a point of focus during the creation of this book. The test taking strategies outlined in this book can be used successfully to challenge most other Nursing Certification Exams. These test taking tips and strategies are detailed, thorough and time-tested. As a Certified Registered Nurse, I have time and again used the ideas in this book to successfully pass Certification Exams in Multiple Sclerosis Nursing, Infusion Nursing, Case Management Nursing and Critical Care Nursing, each at just one attempt! This book, and my other book titled, "MSCN Exam Preparation: 150 Test Review Questions," are invaluable study materials for the Multiple Sclerosis Nursing International Certification Examination. I firmly believe that both of these books will be very helpful to MSCN Exam Candidates, who want to prepare incredibly well, to leave no stone unturned, to elevate the chances of "Acing" the Multiple Sclerosis Nursing Certification Examination!

TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 424: Engineering Economic Analysis Practices for Highway Investment explores how U.S. transportation agencies have applied engineering economics--benefit--cost analyses and similar procedures--to decisions on highway investments.

Value Management is a philosophy, set of principles and a structured management methodology for improving organisational decision-making and value-for-money. The second edition builds on the success of the first edition by extending the integrated value philosophy, methodology and tool kit to describe the application of Value Management to the areas of service delivery, asset management, and Programmes, in addition to Projects, products and processes. Value Management is a well-established methodology in the international construction industry, and in the UK has been endorsed as good practice in a range of government sponsored reports. In this book the authors have addressed the practical opportunities and difficulties of Value Management by synthesising the background, international developments, benchmarking and their own extensive consultancy and action research experience in Value Management to provide a comprehensive package of theory and practice. The second edition retains the structure of the first edition, covering methods and practices, frameworks of value and the future of value management. It has been thoroughly updated, and a number of new chapters added to encapsulate further extensions to current theory and practice. In particular, the new edition responds to: A range of recent UK industry and government publications; and most notably BS EN 16271:2012 - Value management: Functional expression of the need and functional performance specification; the imminent update of BS EN 12973:2000 Value Management;

BS EN 1325 Value Management – Vocabulary, Terms and definitions; the changes to "Value for Europe" governing the training and certification of Value Management in European Union countries; the UK Government's Management of Value (MoV) initiative, together with other leading reports, international guidance and standards on Value Management. Research in Value Management undertaken since publication of the first edition. Changes in Value Management practice particularly in Programmes and Projects. Developments in the theory of value, principally value for money measures, whole life value option appraisal, and benefits realisation. Initiatives in asset management initiatives covering the management of physical infrastructure, for example the recent launch of a suite of three standards under the generic title of BS ISO 55000: 2014 Asset Management, and its predecessor BSI PAS55 2008 "Asset Management: Specification For The Optimized Management Of Physical Assets" The second edition contains a dedicated chapter of exemplar case studies drawn from the authors' experience, selected to demonstrate the new areas of theory and practice. An Appendix includes an extensive set of tools and techniques of use in Value Management practice. Construction clients, including those in both the public and private sectors, and professionals such as construction cost consultants, quantity surveyors, architects, asset managers, construction engineers, and construction managers will all find Value Management of Construction Projects to be essential reading. It will also be of interest to researchers and students on construction related courses in Higher Education – particularly those at final year undergraduate and at Masters level.
