Site Analysis A Contextual Approach To Sustainable Land ...

Architectural site analysis, is the process of evaluating a particular locations physical, mental and social characteristics with the ambition of developing an architectural solution that will both address and enhance its internal and external context. "To develop a project of any merit, its site must first be measured"

Introduction To Architecture Site Analysis — Archisoup ...

Site analysis is a preliminary phase of architectural and urban design processes dedicated to the study of the climatic, geographical, historical, legal, and infrastructural context of a specific site. The result of this analytic process is a summary, usually a graphical sketch, which sets in relation the relevant environmental information with the morphology of the site in terms of parcel, topography, and built environment.
