A comprehensive introduction to psycholinguistic theory with activities, study questions, commentaries and key readings.

This book provides a unique account of the history of integrated circuit, the microelectronics industry and the people involved in the development of transistor and integrated circuit. In this richly illustrated account the author argues that the group of inventors was much larger than originally thought. This is a personal recollection providing the first comprehensive behind-the-scenes account of the history of the integrated circuit.

Risk Management for Park, Recreation, and Leisure Services provides park, recreation, and leisure services professionals a primer in risk management, tort liability, and negligence that gives them an awareness of legal liability and allows them to take the lead in managing risk within their organizations. It covers topics from the emergency action plan, to the risk management plan, to managing employees through the lens of minimizing risk, to addressing risk at events and in facilities. This book provides recreation professionals with the necessary knowledge to build, implement, and manage a risk management plan that first and foremost offers participants a quality experience in a safe environment and, second, protects the professionals and their employees from undue risk.

Nonie Darwish lived for thirty years in a majority Muslim nation. Everything about her life—family, sexuality, hygiene, business, banking, contracts, economics, politics, social issues, everything—was dictated by the Islamic law code known as Sharia. But Sharia isn't staying in majority Muslim nations. Darwish now lives in the West and brings a warning; the goal of radical Islam is to bring Sharia law to your country. If that happens, the fabric of Western law and liberty will be ripped in two. Under Sharia law: A woman can be beaten for talking to men who are not her relatives and flogged for not wearing a headress Daughters, sisters, and wives can be legally killed by the men in their family Non-Muslims can be beheaded, and their Muslim killers will not receive the death penalty Certain kinds of child molestation are allowed The husband of a "rebellious" wife can deny her medical care or place her under house arrest Think it can't happen? In 2008, England—once the seat of Western liberty and now the home of many Muslim immigrants—declared that Sharia courts in Britain have the force of law. When Muslim populations reach as little as 1 or 2 percent, says Darwish, they begin making demands of the larger community, such as foot-level faucets for washing before praying in public schools, businesses, and airports. "Airports in Kansas City, Phoenix, and Indianapolis are among those who have already installed foot baths for Muslim cab drivers," writes Darwish. These demands test how far Westerners will go in accommodating the Muslim minority. How far will they push? The Organization of the Islamic Conference works to Islamize international human rights laws and apply Sharia "standards" for blasphemy to all nations. The penalty for blasphemy? Death. Weaving personal experience together with extensive documentation and research, Darwish exposes the facts and reveals the global threat posed by Sharia law. Anyone concerned about Western rights and liberties ignores her warning and analysis at their peril.

This book highlights new advances in biometrics using deep learning toward deeper and wider background, deeming it " Deep Biometrics ". The book aims to highlight recent developments in biometrics using semi-supervised and unsupervised methods such as Deep Neural Networks, Deep Stacked Autoencoder, Convolutional Neural Networks, Generative Adversary Networks, and so on. The contributors demonstrate the power of deep learning techniques in the emerging new areas such as privacy and security issues, cancellable biometrics, soft biometrics, smart cities, big biometric data, biometric banking, medical biometrics, healthcare biometrics, and biometric genetics, etc. The goal of this volume is to summarize the recent advances in using Deep Learning in the area of biometric security and privacy toward deeper and wider applications. Highlights the impact of deep learning over the field of biometrics in a wide area; Exploits the deeper and wider background of biometrics, such as privacy versus security, biometric big data, biometric genetics, and biometric diagnosis, etc.; Introduces new biometric applications such as biometric banking, internet of things, cloud computing, and medical biometrics.

This book addresses main issues concerned with the future learning, learning and academic analytics, virtual world and smart user interface, and mobile learning. This book gathers the newest research results of smart learning environments from the aspects of learning, pedagogies, and technologies in learning. It examines the advances in technology development and changes in the field of education that has been affecting and reshaping the learning environment. Then, it proposes that under the changed technological situations, smart learning systems, no matter what platforms (i.e., personal computers, smart phones, and tablets) they are running at, should be aware of the preferences and needs that their users (i.e., the learners and teachers) have, be capable of providing their users with the most appropriate services, helps to enhance the users' learning experiences, and to make the learning efficient.

A Top 25 CHOICE 2016 Title, and recipient of the CHOICE Outstanding Academic Title (OAT) Award. How much energy is released in ATP hydrolysis? How many mRNAs are in a cell? How genetically similar are two random people? What is faster, transcription or translation?Cell Biology by the Numbers explores these questions and dozens of others provid
