This is a guide for staying inspired and experiencing greater creative productivity than you ever imagined possible.

A practical handbook for every manager charged with leading teams to creative brilliance, from the author of The Accidental Creative and Die Empty. Doing the work and leading the work are very different things. When you make the transition from maker to manager, you give ownership of projects to your team even though you could do them yourself better and faster. You're juggling expectations from your manager, who wants consistent, predictable output from an inherently unpredictable creative process. And you're managing the pushback from your team of brilliant, headstrong, and possibly overqualified creatives. Leading talented, creative people requires a different skill set than the one many management books offer. As a consultant to creative companies, Todd Henry knows firsthand what prevents creative leaders from guiding their teams to success, and in Herding Tigers he provides a bold new blueprint to help you be the leader your team needs. Learn to lead by influence instead of control. Discover how to create a stable culture that empowers your team to take bold creative risks. And learn how to fight to protect the time, energy, and resources they need to do their best work. Full of stories and practical advice, Herding Tigers will give you the confidence and the skills to foster an environment where clients, management, and employees have a product they can be proud of and a process that works.

"Most of us live with the stubborn idea that we'll always have tomorrow. But sooner or later all of our tomorrows will run out. Each day that you postpone the hard work and succumb to the clutter that chokes creativity, discipline, and innovation will result in a net deficit to the world, to your company, and to yourself. Die Empty is a tool for individuals and companies that aren't willing to put off their best work. Todd Henry explains the forces that keep people in stagnation and introduces a three-part process for tapping into your passion: Excavate: Find the

bedrock of your work to discover what drives you. Cultivate: Learn how to develop the curiosity, humility, and persistence that save you from getting stuck in ruts. Resonate: Learn how your unique brilliance can inspire others"--

From the author of *Die Empty* and *The Accidental Creative*, a new framework for understanding what motivates us and why. What drives us to unleash our best work? And how do we tap into that drive to get superior results with our managers, coworkers, and direct reports? As Todd Henry reveals in this illuminating book, drawing on decades of research and interviews with over 100,000 people, the answer is not one size fits all: some people are energized by a race against the clock, while others put in extra effort only when they feel part of a team. For still others, nothing is as motivating as the possibility of public recognition. Henry shows, in fact, that there are twenty-seven "motivational themes", each with its own unique DNA. For instance:

- Those driven to Achieve Potential strive to build an ideal future, even when others may not see as far ahead.
- Those needing to Overcome must conquer whatever obstacles come their way, no matter how difficult or time-consuming.
- Those who strive to Comprehend and Express are obsessed with mastering new skills and showing off what they know--which is often a lot.
- Those who want to Make It Right thrive when systems are running smoothly and usually know the "proper way" to do things.

The Motivation Code teaches us to decode our Core Motivation so that we can have conversations, make decisions, and even choose career paths that lead us to experience engagement and fulfillment. Once we know how to activate our inner drivers, we can transform the work we do into work we love.

Teaches readers how to develop an authentic voice in their work, regardless of occupation, and argues that developing an authentic voice will lead to success and greater job satisfaction.

How the world's leading innovators push their ideas to fruition again and again Edison famously said that genius is 1 percent inspiration, 99 percent perspiration. Ideas for new businesses, solutions to the world's problems, and artistic breakthroughs are common, but great execution is rare. According to Scott Branson, the capacity to make ideas happen can be developed by anyone willing to develop their organizational habits and leadership capability. That's why he founded Behance, a company that helps creative people and teams across industries develop these skills. Branson has spent six years studying the habits of creative people and teams that are especially productive--the ones who make their ideas happen time and time again. After interviewing hundreds of successful creatives, he has compiled their most powerful--and often counterintuitive--practices, such as:

- Generate ideas in moderation and kill ideas liberally
- Prioritize through nagging
- Encourage fighting within your team

While many of us obsess about discovering great new ideas, Branson shows why it's better to develop the capacity to make ideas happen--a capacity that endures over time.
